Projects

- Go Ahead Travel (NodeJs, ExpressJs, MongoDB, Stripe, PUG, CSS):

A travel booking full-stack web application, where users can purchase travel via bank card, create an account, log in and log out, with the ability to reset their password and update their data (name, photo, and email basically), with an improved user experience. An emailing feature is provided each time a user signup, attempts to reset the password, or purchases travel.

- Airbnb Clone (Python, JavaScript, MySQL, Flask, HTML, CSS):

A complete full-stack web application, integrating a MySQL database and Flask RESTful API in the back-end with a dynamic HTML5/CSS/jQuery in the front-end.

- Space Survivor (Python, OpenGL, OpenAL):

Space Survivor (Python, OpenGL, OpenAL):
A 2D game using Arcade which is a python Library to build games using the OOP features with a bunch of other technologies such as webGL and webAL to generate 2D, 3D interfaces, and 3D audio.

Experience

Full-Stack Web Developer and Web Mentor

Holberton School, Tunis
Full-stack web developer Mai 2022 - present

- Automation of manual reviewed projects. (Selenium, Jest, React Testing Library ...)
- Plan for, organize and lead the weekly peer learning day and animate live coding sessions.
- Create, Update, and maintain the full-stack web curriculum projects.

Education

- Holberton School Tunis | Jan 2020 - Feb 2022
Software engineering Program

- Science university | 2006 - 2007
Earth and Life sciences

Skills

- JAVASCRIPT, ES6+
- PYTHON
- TYPESCRIPT
- NODE JS
- EXPRESS JS
- REACT JS
- HTML
- CSS/SCSS/BOOTSTRAP
- SQL / No-SQL
- NETWORKING (Firewall, load balancer...)
- CODING / PROBLEM SOLVING
- UX Design
- SHELL DevOps
- APIs / REST APIs
- JEST
- SELENIUM
- REACT TESTING LIBRARY

Achievements

- AWS Cloud practitioner Essentials certificate
